Good Day Farm 0.3g **Disposable Metered Dose Inhaler (MDI) Pens** are available in the same medicinally beneficial terpene profiles as our flower. We extract our purely refined oil using the CO2 method, then de-wax and filter away the less desirable plant-based compounds like chlorophyll and cellulose. This process creates a clean and semi-transparent, amber colored cannabis oil. We then reintroduce strain-specific cannabis-derived terpenes. We never add anything derived from non-cannabis origins, ensuring our oil is as pure and precise to the plant profile as possible.

NO MCT OIL.

**NO VITAMIN E
ACETATE.**

NO FILLERS.
