

**GOOD PEOPLE.
GOOD CANNABIS.
GOOD DAY.**

 www.gooddayfarm.com

Made using local, all natural **Honey** from Hummer & Son in Bossier City, the raw honey nectar goes straight from the hive into our cannabis infusion process. Good Day Farm's methodology preserves all the beneficial healing properties and allergy fighting enzymes that raw honey offers. GDF's Executive Chef was involved in the entire process—from the beekeeping to the bottling. We're excited to bring the highest quality local, cannabis-infused honey to Louisiana! Each 3 oz. jar contains 450mg of full-spectrum THC. Dosing teaspoon included, 1 teaspoon equals 25mg of THC.

BENEFITS OF HONEY

*not related to the addition of cannabis

- suppresses cough, soothes sore throat
- fights cold, flu, and allergy symptoms
- promotes melatonin production for restful sleep
- improves gut health and digestive issues
- supports overall immune health
- rich with vitamins, minerals, protein, phytonutrients, and enzymes
- antioxidant, antibacterial, antimicrobial, antifungal, and prebiotic properties
